

Research questions in Notre-Dame de Paris :

Consolidated file with research questions:

<https://docs.google.com/spreadsheets/d/1DsKV5sueIGA2fV6CyE3CF7O4319oGBS1b2ruBRQ3G2s/edit?usp=drivesdk>

The research in ND gathers around 170 scholars and is organized in working groups by materials: stone WG, timber WG, metal WG, ... the digital WG is a transversal WG that facilitate intergroup collaboration through digital means. The research questions can be about objects, documents or data that is specific to a WG but the most interesting questions are complex queries on datasets from different WG, with temporal and see partial components.
